

GETREN® R 4220

Chemical description

Mixture of surfactants and polyether

Physical properties

Appearance	yellowish, clear
Active matter	100 %
Viscosity (25 °C)	1 200 – 1 700 mPas
Specific gravity (25 °C)	approx. 1 g/cm ³
Cloud point (4 % in water)	> 95 °C

Application

GETREN® R 4220 is a release agent mainly used for the production of ECO and EPDM rubber hoses (sulphur & peroxide rubber).

Advantages

- Excellent slip and release properties
- Good lubricating properties on the mandrels after vulcanisation
- Water-soluble, thus easily removable by washing with cold water, no additional detergent required

Dosage/Handling

GETREN® R 4220 is recommended to be used in **non-diluted form**. The release agent should be applied by dipping or brushing of the mandrels.

Dilution with water is possible and even required for its washability. However, very strong dilutions may reduce the release effect, thus all dilutions must be tested first under the customer's specific circumstances. For further information please contact our technical managers.

Registration status

The ingredients of GETREN® R 4220 are listed in the following chemical inventories:

EINECS, TSCA, DSL, ENCS, ECL, AICS, China

Storage stability

In originally sealed containers and at temperatures between 10°C and 30°C GETREN® R 4220 can be stored for at least 1 year. GETREN® R 4220 should not be stored below 10 °C.

Protect from frost !

Packaging

25 kg PE drum (300 kg per pallet)
200 kg PE drum (800 kg per pallet)
1 000 kg PE container

Hazardous goods classification

Information concerning

- classification and labelling according to regulations for transport and for dangerous substances
- protective measures for storage and handling
- measures in case of accidents and fire
- toxicity and ecological effects

is given in our material safety data sheets.
